

PROTECT YOUR MOBILE DEVICE AND DATA WITH THESE 8 MEASURES

Access Control, including biometrics – such as fingerprint scanning – where possible

Data loss prevention, such as on-device encryption

Automated device backup

Remote find and wipe

Regular updating of applications and operating systems

Common sense – don't jailbreak (iOS) or root (Android) devices, and only use trusted app markets such as the App Store or Google Play

Training, particularly around paying attention to permissions requested by an app

Deploy and enforce Bring Your Own Device (BYOD) policies, ensure compliance to company policies and protect your mobile devices against potential threats
